Sept. 24 - 40

CHRISTIAN SCIENCE CHURCH

Rising over the city's roofs and spires is the great dome of the First Church of Christ, Scientist, known as the "Mother Church". In Boston, the Christian Science movement was founded, and its administrative center is here. The auditorium seats approximately five thousand. The general effect is one of breadth, spaciousness, and all pervading light.

Dear Friend. The convention was a grand success as you will see by the Roll of Boston Poets I sent you. Will be home in about a week and hope to see you soon thereafter. Sincerely Wolf
